

Table of Contents

Introduction.....	1
Objective of This Book	1
Textbook Outline	2
Textbook Conventions	3
Exercise Files	3
System Configuration.....	4
Datum Features	5
Introduction.....	5
Sketches and Datum Curves	6
Uses for Sketches and Datum Curves	6
The Sketch Feature	7
Datum Curve Thru Points	7
Datum Curves From Equations	10
Projected and Wrapped	11
Datum Curves by Intersection	12
Datum Tag Display.....	13
Datum Graph.....	14
Using Datum Graphs	15
Datum Evaluate.....	16
Using the Evaluate Feature	17
Mass Properties	18
Mass Properties Results	19
Exercise 1 – Datum Features	20
Advanced Blends	32
Introduction.....	32
Rotational Blend	32
General Blend	33
Options for Non-Parallel Blends.....	34
Swept Blend	35
Facts about Swept Blends	35
Swept Blend (continued)	36
Swept Blend (continued)	37
Optional Tangency	38
Blend Vertex.....	38
Sharp or Smooth Cap	39
Facts about Advanced Blends	39
Exercise 2 – Advanced Blends	40
Advanced Sweeps	53
Variable Section Sweep	53
The Variable Section Sweep Tool.....	54
Normal to Trajectory	55
Constant Normal Direction.....	56

Normal to Projection	56
Trajpar	57
Facts about Variable Section Sweeps	57
Helical Sweep	58
Exercise 3 – Advanced Sweeps	59
Involute Gears.....	76
Introduction.....	76
The Involute Curve	77
Datum Curves From Equation	78
Creating the Gear.....	79
Gear Parameters.....	80
Exercise 4 – Involute Gears.....	81
Advanced Patterns	88
Introduction.....	88
The Pattern Tool	89
Pattern Options	90
Pattern Tables.....	91
Pattern Tables (continued).....	92
Pro/TABLE	93
The Tables Dialog Box.....	94
Fill Patterns	95
Fill Patterns (continued)	96
Pattern Relations.....	97
Pattern Relations (continued).....	98
Working with Patterns	99
Modifying Patterns	99
Redefining Patterns	99
Deleting Patterns	99
In the Model Tree.....	99
Exercise 5 – Advanced Patterns	100
User Defined Features	109
Introduction.....	109
Part UDFs.....	109
Assembly UDFs	110
Creating UDFs	111
Using UDFs	112
User Defined Features (continued).....	113
Managing UDFs	114
Tips on UDFs	114
Exercise 6 – User Defined Features	115
The Draft Feature.....	124
Introduction and Terms	124
The Draft Tool	125
Draft Surfaces	126
Draft Hinges	126
Pull Direction and Draft Angle	126
Split Draft.....	127
Split by Draft Hinge.....	127

Split by Split Object.....	127
Variable Draft	128
Exercise 7 – The Draft Feature.....	129
Advanced Rounds	134
Introduction and Terminology.....	134
The Round Tool	135
Round Sets.....	136
Transitions.....	137
Tips on Rounds.....	138
Exercise 8 – Advanced Rounds	139
Special Features	163
Introduction.....	163
Offset.....	164
The Offset Tool	165
Offset Expand	166
Offset With Draft.....	167
Warp.....	168
Toroidal Bend.....	170
Lip.....	171
Ear.....	172
Facts About Ear Features.....	172
Local Push.....	173
Radius Dome	173
Exercise 9 – Special Features	174
Parameters and Relations	184
Introduction.....	184
Parameters.....	185
System Parameters	185
Reserved Parameters.....	185
User Parameters.....	185
Parameter Access	185
The Parameters Dialog Box.....	186
The Parameters Dialog Box (continued).....	187
Relations	188
Part Relations	188
Assembly Relations	188
Feature Relations	189
Pattern Relations	189
Relation Comments	189
Equality and Constraint Relations.....	190
The Relations Dialog Box.....	191
The Relations Dialog Box (continued)	192
The Relations Dialog Box (continued)	193
Functions and Operators in Relations.....	194
Mass Properties Functions.....	195
Logic Statements	196
Motion.....	196
Solving Simultaneous Equations	197
Exercise 10 – Parameters and Relations	198

Family Tables	212
Introduction.....	212
The Family Table Editor	213
Creating Generic Models	214
Creating a New Family Table.....	214
Adding Items to the Family Table	215
Naming Items in the Family Table	215
Adding Instances to the Family Table.....	216
The Family Table Editor	217
The Family Table Editor (continued).....	218
Adding Comment Rows	219
Using Negative Values in Family Tables	220
Preview Instances	221
Verify Instances.....	222
Nested Family Tables	223
Reference Models	224
Assembly Family Tables	225
Assembly Instance Configurator	226
Patternize Instances.....	227
Using Microsoft Excel.....	228
Instance Index Files	229
Instance Accelerator Files.....	230
Replacing Components in an Assembly	231
Drawings and Family Tables.....	232
Exercise 11 - Family Tables	233
Component Interfaces	249
Introduction.....	249
Defining an Interface	251
Defining an Interface (continued).....	252
Defining an Interface (continued).....	253
Nested Component Interfaces	253
Using an Interface	254
Component Interface Preferences	255
Component Interface Configuration Options.....	255
Drag-and-Drop Component Placement	256
Exercise 12 – Component Interfaces	257
Component Flexibility	266
Introduction.....	266
Defining Flexibility in the Assembly.....	267
Re-Defining Flexibility in the Assembly.....	268
Defining Flexibility During Assembly Process.....	268
Defining Flexibility in the Part.....	269
Examples of Flexible Parts.....	270
Removing Flexibility	271
Propagate Flexibility.....	272
Exercise 13 – Component Flexibility	273
Assembly Design	282
Introduction.....	282
Create a New Assembly.....	283

Assemble Existing Components	283
Create New Components	284
Activating Components	285
Working in the Active Component	286
Assembly Features	287
Assembly Features (continued)	288
Repeat Components	289
Replace Components	290
Include Components	291
Package Components	292
Assembly Regeneration	293
Assembly Restructure	294
Assembly Setup Menu	295
Assembly Bill of Materials	296
Custom Bill of Materials	297
Custom Bill of Materials (continued)	298
Exercise 14 – Assembly Design	299
Data Sharing Commands	308
Introduction	308
From File	309
Publish Geometry	310
Publish Geometry (continued)	311
Copy Geometry	312
Copy Geometry (continued)	313
Merge/Inheritance/Cutout	314
Merge/Inheritance/Cutout (continued)	315
Merge/Inheritance/Cutout (continued)	316
Merge/Inheritance/Cutout (continued)	317
Varied Items (Inheritance Only)	317
Updating the Inheritance Feature	318
Shrinkwrap	319
Shrinkwrap (continued)	320
Exercise 15 – Data Sharing Commands	321
Top Down Assembly Design	333
Introduction	333
Create the Assembly Structure	333
Adding Components	334
Assembling New Components	335
Define Design Parameters	335
Create the Skeleton Model	336
Introduction	336
Facts About Skeletons	336
Create the Skeleton Part	336
Copy the Necessary Design Information	337
Designing in the Assembly	338
Finish the Design	338
Exercise 16 – Top Down Assembly Design	339
Interchange Assemblies	368
Introduction	368

Interchange Types	369
Creating Interchange Assemblies	369
Adding Components.....	370
Adding Components (continued)	371
The Model Tree.....	371
Reference Tags.....	372
Auto Tag.....	373
Assigning Tags.....	374
When to use Functional Interchange Assemblies	375
Automatic Replacement of Assembly Components.....	375
Removing References to Interchange Assemblies	375
Review.....	375
Exercise 17 – Interchange Assemblies	376
Introduction to Pro/PROGRAM	382
Introduction.....	382
The Program Menu	383
Editing a Program	384
Program Structure.....	385
Program Header	385
Input Section	385
Input Section (continued).....	386
Relations Section.....	387
Features Section.....	387
Features Section (continued).....	388
Mass Properties Section.....	389
The Interact Command	390
The Execute Command	391
The Lookup Command.....	392
Assembly Programs	393
Replacing Assembly Components	393
Feature Comments	394
Incorporate the Program	394
Regenerating Models with Programs.....	395
Creating Models using a Text File	395
Creating Family Table Instances	396
Program Examples.....	397
Exercise 18 – Introduction to Pro/PROGRAM	398
Layouts	408
Introduction.....	408
Advantages of Layouts.....	409
Considerations for Using Layouts	409
Creating Layouts	410
Creating Layout Parameters	411
Parameter Sets	412
Creating Layout Relations.....	413
Tables.....	414
Sheets, Notes, and Other Tools.....	414
Example Layouts.....	415
Using Layouts	416
Part Relations Utilizing Global Parameters.....	416

Global Datums and Automatic Assembly.....	417
Layout Review.....	417
Exercise 19 – Layouts	418
Simplified Representations	430
Introduction.....	430
Facts About Simplified Reps.....	431
Types of Simplified Representations	432
Master Rep	432
Symbolic Rep.....	432
Geometry Rep.....	433
Graphics Rep.....	433
Default Rep.....	433
User Defined Reps	433
Simplified Reps in Part Models.....	434
Simplified Reps in Assembly Models.....	435
Examples.....	435
Examples (continued)	436
Zones	437
Envelopes.....	438
Envelopes (continued)	439
Opening Simplified Reps.....	440
Open Reps by Default.....	441
On-Demand Simplified Reps.....	442
On-Demand Settings	442
Working with On-Demand Simplified Reps	443
External Simplified Reps	444
Using the View Manager.....	445
Using the File, Save a Copy Command	446
Using the File, New Command	447
Exercise 20 – Simplified Representations	448
Managing External References	463
Introduction.....	463
The Model Tree.....	463
External Reference Types.....	465
Circular References	466
The Global Reference Viewer.....	467
Global Reference Viewer Filters	468
The Reference Graph	469
The Reference Information Window	470
Reference Control	471
Reference Control Configuration Options	472
Breaking External References	473
Exercise 21 – Managing External References	474
