

Table of Contents

Introduction.....	1
Objective of This Book	1
Textbook Outline	2
Textbook Conventions	3
Exercise Files	3
System Configuration.....	4
Datum Features	5
Introduction.....	5
Sketches and Datum Curves	6
Uses for Sketches and Datum Curves	6
The Sketch Feature	7
Datum Curve Thru Points	7
Datum Curves From Equations	10
Projected and Wrapped	11
Datum Curves by Intersection	12
Datum Tag Display.....	13
Datum Graph.....	14
Using Datum Graphs	15
Datum Evaluate.....	16
Using the Evaluate Feature	17
Mass Properties	18
Mass Properties Results	19
Exercise 1 – Datum Features	20
Advanced Blends	36
Introduction.....	36
Rotational Blend	36
General Blend	37
Options for Non-Parallel Blends.....	38
Swept Blend	39
Facts about Swept Blends	39
Swept Blend (continued)	40
Swept Blend (continued)	41
Optional Tangency	42
Blend Vertex.....	42
Sharp or Smooth Cap	43
Facts about Advanced Blends	43
Exercise 2 – Advanced Blends	44
Advanced Sweeps	57
Variable Section Sweep	57
The Variable Section Sweep Dashboard Tool	58
Normal to Trajectory	59
Constant Normal Direction.....	60

Normal to Projection	60
Trajpar	61
Facts about Variable Section Sweeps	61
Helical Sweep	62
Exercise 3 – Advanced Sweeps	63
Involute Gears.....	80
Introduction.....	80
The Involute Curve	81
Datum Curves From Equation	82
Creating the Gear.....	83
Gear Parameters.....	84
Exercise 4 – Involute Gears.....	85
Advanced Patterns	92
Introduction.....	92
Table Driven Patterns	93
Table Driven Patterns (continued)	94
Pro/TABLE	95
The Tables Dialog Box.....	96
Fill Patterns	97
Fill Patterns (continued)	98
Pattern Relations.....	99
Pattern Relations (continued).....	100
Geometry Patterns	101
Exercise 5 – Advanced Patterns	102
User Defined Features	121
Introduction.....	121
Part UDFs.....	121
Assembly UDFs	122
Creating UDFs	123
Using UDFs.....	124
Using UDFs (continued).....	125
Using UDFs (continued).....	126
On-Surface Coordinate System UDFs.....	127
Managing UDFs	128
Tips on UDFs	128
Exercise 6 – User Defined Features	129
The Draft Feature.....	144
Introduction and Terms	144
The Draft Dashboard Tool.....	145
Draft Surfaces	146
Draft Hinges	146
Pull Direction and Draft Angle.....	146
Split Draft.....	147
Split by Draft Hinge.....	147
Split by Split Object.....	147
Variable Draft	148
Exercise 7 – The Draft Feature.....	149

Advanced Rounds	153
Introduction and Terms	153
The Round Dashboard Tool.....	154
Round Sets.....	155
Transitions.....	156
The Auto Round Command	157
Tips on Rounds	158
Exercise 8 – Advanced Rounds	159
Special Features	177
Introduction.....	177
Offset.....	178
The Offset Dashboard Tool.....	179
Offset Expand	180
Offset With Draft.....	181
Warp.....	182
Toroidal Bend.....	184
Lip.....	185
Ear.....	186
Facts About Ear Features	186
Local Push.....	187
Radius Dome	187
Pipe	188
Exercise 9 – Special Features	189
Parameters and Relations	201
Introduction.....	201
System Parameters.....	202
User Defined Parameters.....	202
The Parameters Dialog Box.....	203
Relations	204
Relations (continued)	205
Equality and Constraint Relations	206
The Relations Dialog Box.....	207
The Relations Dialog Box (continued)	208
The Relations Dialog Box (continued)	209
Functions and Operators in Relations.....	210
Mass Properties Functions.....	211
Logic Statements	212
Motion.....	212
Solving Simultaneous Equations	213
Exercise 10 – Parameters and Relations	214
Family Tables	227
Introduction.....	227
The Family Table Editor	228
Creating Generic Models	229
Creating a New Family Table.....	229
Adding Items to the Family Table	230
Naming Items in the Family Table	230
Adding Instances to the Family Table.....	231
The Family Table Editor	232

The Family Table Editor (continued).....	233
Adding Comment Rows	234
Using Negative Values in Family Tables	235
Preview Instances	236
Verify Instances.....	237
Nested Family Tables	238
Reference Models	239
Assembly Family Tables	240
Assembly Instance Configurator	241
Patternize Instances.....	242
Using Microsoft Excel.....	243
Instance Index Files	244
Instance Accelerator Files	245
Replacing Components in an Assembly	246
Drawings and Family Tables.....	247
Exercise 11 - Family Tables.....	248
Component Interfaces.....	264
Introduction.....	264
Defining an Interface	266
Defining an Interface (continued).....	267
Defining an Interface (continued).....	268
Nested Component Interfaces	268
Using an Interface	269
Component Interface Preferences	270
Component Interface Configuration Options.....	270
Drag-and-Drop Component Placement	271
Exercise 12 – Component Interfaces.....	272
Component Flexibility	281
Introduction.....	281
Defining Flexibility in the Assembly.....	282
Re-Defining Flexibility in the Assembly.....	283
Defining Flexibility During Assembly Process.....	283
Defining Flexibility in the Part.....	284
Examples of Flexible Parts.....	285
Removing Flexibility	286
Propagate Flexibility.....	287
Exercise 13 – Component Flexibility	288
Assembly Design.....	297
Introduction.....	297
Create a New Assembly.....	298
Assemble Existing Components	298
Create New Components.....	299
Activating Components	300
Working in the Active Component.....	301
Assembly Features	302
Assembly Features (continued)	303
Repeat Components	304
Repeat Components (continued)	305
Include Components	306

Package Components	307
Assembly Regeneration	308
Assembly Restructure	309
Bill of Materials	310
Custom Bill of Materials	311
Custom Bill of Materials (continued)	312
Exercise 14 – Assembly Design.....	313
Data Sharing Commands.....	323
Introduction.....	323
From File	324
Publish Geometry.....	325
Publish Geometry (continued).....	326
Copy Geometry	327
Copy Geometry (continued).....	328
Merge/Inheritance/Cutout.....	329
Merge/Inheritance/Cutout (continued)	330
Merge/Inheritance/Cutout (continued)	331
Merge/Inheritance/Cutout (continued)	332
Varied Items (Inheritance Only)	332
Updating the Inheritance Feature	333
Creating a New Source Model	333
Shrinkwrap	334
Shrinkwrap (continued)	335
Exercise 15 – Data Sharing Commands.....	336
Top Down Assembly Design	347
Introduction.....	347
Create the Assembly Structure	347
Adding Components.....	348
Assembling New Components.....	349
Define Design Parameters	349
Create the Skeleton Model.....	350
Introduction	350
Facts About Skeletons.....	350
Create the Skeleton Part	350
Copy the Necessary Design Information	351
Designing in the Assembly.....	352
Finish the Design	352
Exercise 16A – Top Down Assembly Design #1	353
Exercise 16B – Top Down Assembly Design #2	381
Replace Assembly Components.....	395
Introduction.....	395
Replace Unrelated Components	396
Interchange Assembly.....	397
Interchange Types	398
Creating Interchange Assemblies	398
Adding Components to Interchange Assemblies	399
Reference Paring	400
Reference Paring (continued).....	401
Additional Reference Tags.....	402

Interchange Assembly Model Tree	402
When to use Functional Interchange Assemblies	403
Removing References to Interchange Assemblies	403
Interchange Assembly Review	403
Exercise 17 – Replace Assembly Components	404
Introduction to Pro/PROGRAM	410
Introduction	410
The Program Menu	411
Editing a Program	412
Program Structure	413
Program Header	413
Input Section	413
Input Section (continued)	414
Relations Section	415
Features Section	415
Features Section (continued)	416
Mass Properties Section	417
The Interact Command	418
The Execute Command	419
The Lookup Command	420
Assembly Programs	421
Replacing Assembly Components	421
Feature Comments	422
Incorporate the Program	422
Regenerating Models with Programs	423
Creating Models using a Textfile	423
Creating Family Table Instances	424
Program Examples	425
Exercise 18 – Introduction to Pro/PROGRAM	426
Layouts	436
Introduction	436
Advantages of Layouts	437
Considerations for Using Layouts	437
Creating Layouts	438
Creating Layout Parameters	439
Parameter Sets	440
Creating Layout Relations	441
Tables	442
Sheets, Notes, and Other Tools	442
Example Layouts	443
Using Layouts	444
Part Relations Utilizing Global Parameters	444
Global Datums and Automatic Assembly	445
Layout Review	445
Exercise 19 – Layouts	446
Simplified Representations	458
Introduction	458
Types of Simplified Representations	459
Facts About Simplified Reps	460

Simplified Reps in Part Models	461
Simplified Reps in Part Models (continued)	462
Simplified Reps in Assembly Models	463
The Component Chooser	464
Default Rep	466
Default Envelope Rep	467
Zones	469
Zones (continued)	470
Envelopes.....	471
Envelopes (continued)	472
Opening Simplified Reps.....	473
Open Reps by Default.....	474
On-Demand Simplified Reps.....	474
On-Demand Settings	474
On-Demand Settings (continued)	475
Working with On-Demand Simplified Reps	476
External Simplified Reps	477
Using the View Manager.....	478
Using the File, Save a Copy Command	479
Using the File, New Command	480
Exercise 20 – Simplified Representations	481
Managing External References	498
Introduction.....	498
The Model Tree	498
External Reference Types.....	500
Circular References	501
The Reference Viewer	502
The Reference Viewer (continued)	503
The Reference Viewer (continued)	504
Reference Control	505
Reference Control Configuration Options	506
Breaking External References	507
Exercise 21 – Managing External References	508
Appendix A.....	511
Exercise 22	511
Exercise 23.....	522
Exercise 24.....	532
Exercise 25.....	536
