

Table of Contents

Introduction.....	1
Objective of This Textbook	1
Sheetmetal Models	2
Textbook Outline	2
Textbook Conventions	3
Exercise Files.....	3
System Configuration.....	4
General Terms	5
Geometric Terms	8
Sheetmetal Terms.....	11
Sheetmetal Ribbon.....	12
Object Selection and Viewing	13
Introduction	13
Object Selection	13
Selection Filters and Status Box	13
Selection Filters and Selected Items Dialog Box	14
Selection Techniques.....	15
Using Query Select	16
The Model Tree.....	17
Viewing the Model.....	18
Spin, Pan, and Zoom	19
The View Manager	20
Sheetmetal Methodology	21
Unattached Walls.....	22
Introduction	22
Extrude Wall.....	23
Planar Wall.....	25
Revolve Wall	26
Blend Wall	27
Offset Wall.....	28
Exercise 1 – Unattached Walls.....	29
Additional Walls.....	56
Introduction	56
Flat Walls	57
Flange Walls	59
Relief	64
Twist Walls	65
Exercise 2 – Additional Walls.....	66

Extend and Merge Walls	87
Introduction	87
Extend Wall	87
Merge Walls	89
Exercise 3 – Extend and Merge Walls	90
Bends	93
Introduction	93
Bend Types	93
Bend	94
Bend Relief	96
Bend Allowance	97
Bends with Transitions	98
Edge Bend	99
Planar Bend	100
Exercise 4 – Bends	101
Unbend	111
Introduction	111
Unbend Types	112
Regular Unbend	113
Deformations	114
Distinct Areas	115
Deformation Control	116
Transitional Unbend	117
Cross-Section Driven Unbend	118
Exercise 5 – Unbend	119
Cut, Round, Chamfer, and Hole	126
Introduction	126
Extruded Cut	127
Extruded Cut vs. Sheetmetal Cut	128
Sheetmetal Cut	129
Rounds	130
Edge Chamfer	131
Simple Holes	132
Exercise 6 – Cut, Round, Chamfer, and Hole	133
Punch and Notch	154
Introduction	154
Creating the Cut Feature	155
Defining the Punch and Notch UDF	156
The UDF Dialog Box	157
Considerations for Punch and Notch Features	158
Exercise 7 – Punch and Notch	159

Bend Back	168
Introduction	168
Bend Back	169
Exercise 8 – Bend Back	170
Form Features.....	179
Introduction	179
Form Feature Types.....	180
Punch Form.....	181
Punch Directory.....	183
Die Form	184
Punch and Form Examples.....	185
Quilt Form	186
Exercise 9 – Form Features.....	187
Project Part Completion.....	196
Introduction	196
Exercise 10 – Project Part Completion.....	197
Flat Pattern and Flatten Form	209
Introduction	209
Flat Pattern Preview.....	209
Flat Pattern.....	210
Flatten Form.....	211
Unstamp Edge	212
Exercise 11 – Flat Pattern and Flatten Form	213
Converting Solid Parts.....	220
Introduction	220
Rip Types	221
Edge Rip	222
Surface Rip	222
Sketched Rip.....	223
Rip Connect	223
Corner Relief.....	224
Exercise 12 – Converting Solid Parts.....	225
The Conversion Feature	234
Introduction	234
Exercise 13 – The Conversion Feature	235
Split Area.....	245
Introduction	245
Creating a Split Area.....	246
Uses for Split Areas	246
Exercise 14 – Split Area.....	247

Bend Allowance	250
Introduction	250
Y Factor and K Factor	250
Bend Allowance Formula	252
Bend Allowance Example	252
Bend Tables	253
Standard Bend Tables	254
Assigning Bend Tables	255
Creating Bend Tables	256
Bend Table Formula.....	257
Bend Table Conversion Equation	258
Bend Table Materials List	259
Bend Table Data	260
Bend Reports	261
Exercise 15 – Bend Allowance	262
Sheetmetal Preferences and Rules	265
Introduction	265
Bends	266
Relief	267
Edge Treatment	268
Miter Cuts	269
Fixed Geometry.....	270
Design Rules.....	271
Flat State Instance	274
Exercise 16 – Sheetmetal Preferences and Rules	275
Bend Order Tables	281
Introduction	281
Bend Order Table Contents	281
Bend Order Table Workflow.....	282
Exercise 17 – Bend Order Tables	283
Project Assembly Creation	285
Introduction	285
Exercise 18 – Project Assembly Creation	286
