

Table of Contents

Introduction.....	1
Objective of This Textbook	1
Sheetmetal Models	2
Textbook Outline	2
Textbook Conventions	3
Exercise Files.....	3
System Configuration.....	4
General Terms	5
Geometric Terms	8
Sheetmetal Terms.....	11
The Message Area and Input Panel	12
Message Icons	12
Toolbars and Icons.....	13
The Sheetmetal Toolbar	15
The Insert Menu	16
Object Selection and Viewing	17
Introduction	17
Object Selection	17
Selection Filters and Status Box	17
Selection Filters and Selected Items Dialog Box	18
Selection Preferences	19
Selection Techniques.....	20
Using Query Select	21
The Model Tree.....	22
The Search Tool.....	23
Viewing the Model.....	24
Spin, Pan, and Zoom	25
Orient Mode	26
The View Manager.....	27
The Environment Dialog Box	28
Sheetmetal Methodology	29
Introduction	29
Unattached Walls.....	31
Introduction	31
Extrude Wall.....	32
Extrude Wall (continued).....	33
Flat Wall	34
Revolve Wall	35
Blend Wall	36

Offset Wall.....	37
Sketching Techniques.....	38
Thicken.....	38
Exercise 1 – Unattached Walls.....	39
Additional Walls.....	67
Introduction	67
Flat Walls	68
Flat Walls (continued)	69
Flange Walls	70
Flange Walls (continued)	71
Flange Walls (continued)	72
Flange Walls (continued)	73
Flange Walls (continued)	74
Relief	75
Twist Walls	76
Exercise 2 – Additional Walls.....	77
Extend and Merge Walls	105
Introduction	105
Extend Wall	105
Merge Walls	106
Exercise 3 – Extend and Merge Walls	107
Bends.....	110
Introduction	110
Bend Types	110
Bend Table.....	112
Bend Line	112
Bend Line Adjustment.....	111
Bend Relief.....	113
Bend Radius.....	115
Regular Bends	116
Bends with Transitions.....	117
Planar Bends.....	119
Exercise 4 – Bends.....	120
Unbend	129
Introduction	129
Unbend Types.....	130
Regular Unbends	131
Deform Control.....	132
Transition Unbend.....	133
Cross-Section Driven Unbend	134
Exercise 5 – Unbend	135
Cut, Round, Chamfer, and Hole	142
Introduction	142

Extruded Cut	143
Extruded Cut vs. Sheetmetal Cut.....	144
Sheetmetal Cut	145
Rounds	146
The Round Tool	147
Edge Chamfer	148
The Chamfer Tool	149
Creating Holes	150
Simple Holes	151
Sketched Holes	152
Standard Holes	153
Standard Holes (continued)	154
Exercise 6 – Cut, Round, Chamfer, and Hole	155
Punch and Notch	176
Introduction	176
Creating the Cut Feature	177
Defining the Punch and Notch UDF	178
The UDF Dialog Box	179
Considerations for Punch and Notch Features	180
Exercise 7 – Punch and Notch	181
Bend Back	190
Introduction	190
Bend Back Options	191
Exercise 8 – Bend Back	192
Form Features.....	200
Introduction	200
Form Feature Options	201
Form Placement.....	202
Punch Form.....	203
Die Form	204
Form Feature Procedure.....	205
Exercise 9 – Form Features.....	206
Project Part Completion.....	212
Introduction	212
Exercise 10 – Project Part Completion.....	213
Flat Pattern and Flatten Form	227
Introduction	277
Flat Pattern.....	227
Flatten Form.....	228
Exercise 11 – Flat Pattern and Flatten Form	229
Converting Solid Parts.....	233
Introduction	233

Edge Bend	234
Rip	235
Rip Types	235
Regular Rip	235
Surface Rip.....	236
Edge Rip.....	236
Corner Relief.....	237
Corner Relief Notes.....	238
Exercise 12 – Converting Solid Parts	239
The Conversion Feature	247
Introduction	247
Point Reliefs	248
Edge Rip	249
Edge Rip Corner Type	249
Rip Connect	250
Bends	251
Corner Reliefs	251
Exercise 13 – The Conversion Feature	252
Deform Area	263
Introduction	263
Creating a Deform Area	264
Uses for Deform Areas	264
Exercise 14 – Deform Area	265
Bend Allowance	269
Introduction	269
Y Factor and K Factor	269
Bend Allowance Formula	270
Bend Allowance Example	270
Bend Tables	271
Bend Table Highlights	271
The Bend Table Menus	271
Bend Table Location	272
Standard Bend Tables	273
Bend Table Creation	274
Bend Table Formula.....	274
Conversion Equation.....	275
Material Data.....	275
Bend Table Data	276
Sheetmetal Reports	277
Exercise 15 – Bend Allowance	278
Sheetmetal Setup and Parameters	281
Introduction	281
Fixed Geometry.....	282
Flat State.....	283

Design Rules 284
Corner Relief 285
Sheetmetal Parameters 286
Sheetmetal Parameters (continued) 287
Exercise 16 – Sheetmetal Setup and Parameters 288

Bend Order Tables 293
Introduction 293
Bend Order Table Contents 293
Bend Order Menu and Procedure 294
Exercise 17 – Bend Order Tables 295

Project Assembly Creation..... 299
Introduction 299
Exercise 18 – Project Assembly Creation..... 300
