

# *Table of Contents*

<b>Introduction.....</b>	<b>1</b>
Objective of This Textbook .....	1
Sheetmetal Models .....	2
Textbook Outline .....	2
Textbook Conventions .....	3
Exercise Files.....	3
System Configuration.....	4
General Terms .....	5
Geometric Terms .....	8
Sheetmetal Terms.....	11
The Sheetmetal Toolbar .....	12
The Insert Menu .....	13
<b>Object Selection and Viewing .....</b>	<b>14</b>
Introduction .....	14
Object Selection .....	14
Selection Filters and Status Box .....	14
Selection Filters and Selected Items Dialog Box .....	15
Selection Preferences.....	16
Selection Techniques.....	17
Using Query Select .....	18
The Model Tree.....	19
Viewing the Model.....	20
Spin, Pan, and Zoom .....	21
The View Manager .....	22
The Environment Dialog Box .....	23
<b>Sheetmetal Methodology .....</b>	<b>24</b>
Introduction .....	24
<b>Unattached Walls.....</b>	<b>26</b>
Introduction .....	26
Extrude Wall.....	27
Flat Wall .....	29
Revolve Wall .....	30
Blend Wall .....	31
Offset Wall.....	32
Sketching Techniques.....	33
Thicken.....	33
<b>Exercise 1 – Unattached Walls.....</b>	<b>34</b>

<b>Additional Walls</b> .....	<b>62</b>
Introduction .....	62
Flat Walls .....	63
Flange Walls .....	65
Relief .....	70
Twist Walls .....	71
<b>Exercise 2 – Additional Walls</b> .....	<b>72</b>
<b>Extend and Merge Walls</b> .....	<b>93</b>
Introduction .....	93
Extend Wall .....	93
Merge Walls .....	94
<b>Exercise 3 – Extend and Merge Walls</b> .....	<b>95</b>
<b>Bends</b> .....	<b>98</b>
Introduction .....	98
Bend Types .....	98
Bend Table .....	100
Bend Line .....	100
Bend Line Adjustment .....	101
Bend Relief.....	102
Bend Radius.....	103
Regular Bends .....	104
Bends with Transitions .....	105
Planar Bends.....	107
<b>Exercise 4 – Bends</b> .....	<b>108</b>
<b>Unbend</b> .....	<b>117</b>
Introduction .....	117
Unbend Types.....	118
Regular Unbends .....	119
Deform Control.....	120
Transition Unbend.....	121
Cross-Section Driven Unbend .....	122
<b>Exercise 5 – Unbend</b> .....	<b>123</b>
<b>Cut, Round, Chamfer, and Hole</b> .....	<b>129</b>
Introduction .....	129
Extruded Cut .....	130
Extruded Cut vs. Sheetmetal Cut.....	131
Sheetmetal Cut .....	132
Rounds.....	133
Edge Chamfer.....	134
Simple Holes .....	135
<b>Exercise 6 – Cut, Round, Chamfer, and Hole</b> .....	<b>136</b>
<b>Punch and Notch</b> .....	<b>157</b>
Introduction .....	157

Creating the Cut Feature .....	158
Defining the Punch and Notch UDF .....	159
The UDF Dialog Box .....	160
Considerations for Punch and Notch Features .....	161
<b>Exercise 7 – Punch and Notch .....</b>	<b>162</b>
<b>Bend Back .....</b>	<b>171</b>
Introduction .....	171
Bend Back Options .....	172
<b>Exercise 8 – Bend Back .....</b>	<b>173</b>
<b>Form Features.....</b>	<b>181</b>
Introduction .....	181
Form Feature Types.....	182
Punch Form.....	183
Punch Directory.....	185
Die Form .....	186
Punch and Form Examples.....	187
Quilt Form .....	188
<b>Exercise 9 – Form Features.....</b>	<b>189</b>
<b>Project Part Completion.....</b>	<b>197</b>
Introduction .....	197
<b>Exercise 10 – Project Part Completion.....</b>	<b>198</b>
<b>Flat Pattern and Flatten Form .....</b>	<b>212</b>
Introduction .....	212
Flat Pattern.....	212
Flatten Form.....	213
<b>Exercise 11 – Flat Pattern and Flatten Form .....</b>	<b>214</b>
<b>Converting Solid Parts.....</b>	<b>218</b>
Introduction .....	218
Edge Bend .....	219
Rip .....	220
Rip Types .....	220
Regular Rip .....	220
Surface Rip.....	221
Edge Rip.....	221
Corner Relief.....	222
Corner Relief Notes.....	223
<b>Exercise 12 – Converting Solid Parts.....</b>	<b>224</b>
<b>The Conversion Feature .....</b>	<b>232</b>
Introduction .....	232
Point Reliefs .....	233
Edge Rip .....	234
Rip Connect .....	235

Bends .....	236
Corner Reliefs .....	236
<b>Exercise 13 – The Conversion Feature .....</b>	<b>237</b>
<b>Deform Area .....</b>	<b>248</b>
Introduction .....	248
Creating a Deform Area .....	249
Uses for Deform Areas .....	249
<b>Exercise 14 – Deform Area .....</b>	<b>250</b>
<b>Bend Allowance.....</b>	<b>254</b>
Introduction .....	254
Y Factor and K Factor .....	254
Bend Allowance Formula .....	255
Bend Allowance Example .....	255
Bend Tables .....	256
Standard Bend Tables .....	258
Bend Table Creation .....	259
Bend Table Formula.....	259
Conversion Equation.....	260
Material Data.....	260
Bend Table Data .....	261
Bend Reports .....	262
<b>Exercise 15 – Bend Allowance.....</b>	<b>263</b>
<b>Sheetmetal Setup and Parameters .....</b>	<b>266</b>
Introduction .....	266
Fixed Geometry.....	267
Flat State .....	268
Design Rules.....	269
Corner Relief.....	270
Sheetmetal Parameters .....	271
<b>Exercise 16 – Sheetmetal Setup and Parameters .....</b>	<b>273</b>
<b>Bend Order Tables .....</b>	<b>278</b>
Introduction .....	278
Bend Order Table Contents .....	278
Bend Order Menu and Workflow.....	279
<b>Exercise 17 – Bend Order Tables .....</b>	<b>280</b>
<b>Project Assembly Creation.....</b>	<b>284</b>
Introduction .....	284
<b>Exercise 18 – Project Assembly Creation.....</b>	<b>285</b>
