

Table of Contents

Introduction.....	1
Objective of This Book	1
Textbook Outline	2
Textbook Conventions	3
Exercise Files	3
System Configuration.....	4
Datum Features	5
Introduction.....	5
Sketches and Datum Curves	6
Uses for Sketches and Datum Curves	6
The Sketch Feature	7
Curve Thru Points	8
Datum Curves From Equations	12
Projected and Wrapped	13
Datum Curves by Intersection	14
Datum Graph.....	15
Using Datum Graphs	16
Datum Evaluate.....	17
Using the Evaluate Feature	18
Mass Properties	19
Mass Properties Results	20
Exercise 1 – Datum Features	21
Advanced Blends	37
Introduction.....	37
Rotational Blend	38
Rotational Blend (continued).....	39
Blend	40
Blend (continued)	41
Start Point and Direction Arrow	42
Blend Vertex	43
Activate Section	44
Swept Blend	45
Facts about Swept Blends	45
Swept Blend (continued).....	46
Swept Blend (continued).....	47
Exercise 2 – Advanced Blends	48
Advanced Sweeps	60
Variable Section Sweep	60
The Sweep Dashboard Tool	61
Normal to Trajectory	62
Constant Normal Direction.....	63
Normal to Projection	63

Trajpar	64
Facts about Variable Section Sweeps	64
Helical Sweep	65
Exercise 3 – Advanced Sweeps	66
Involute Gears.....	79
Introduction.....	79
The Involute Curve	80
Datum Curves From Equation	81
Creating the Gear.....	82
Gear Parameters.....	83
Exercise 4 – Involute Gears.....	84
Advanced Patterns	91
Introduction.....	91
Table Driven Patterns	92
Table Driven Patterns (continued)	93
Pro/TABLE	94
The Tables Dialog Box.....	95
Fill Patterns	96
Fill Patterns (continued).....	97
Pattern Relations.....	98
Pattern Relations (continued).....	99
Geometry Patterns	100
Exercise 5 – Advanced Patterns	101
User Defined Features	118
Introduction.....	118
Part UDFs.....	118
Assembly UDFs	119
Creating UDFs	120
Using UDFs.....	121
Using UDFs (continued).....	122
Using UDFs (continued).....	123
On-Surface Coordinate System UDFs.....	124
Managing UDFs	125
Tips on UDFs	125
Exercise 6 – User Defined Features	126
Advanced Draft	141
Introduction and Terms	141
The Draft Dashboard Tool.....	142
Draft Surfaces	143
Draft Hinges	143
Pull Direction and Draft Angle	143
Split Draft.....	144
Split by Draft Hinge.....	144
Split by Split Object.....	144
Variable Angle Draft	145
Variable Pull Direction Draft.....	146
Exercise 7 – Advanced Draft	147

Advanced Rounds	152
Introduction and Terms	152
The Round Dashboard Tool.....	153
Round Sets.....	154
Transitions.....	155
The Auto Round Feature.....	156
Tips on Rounds	157
Exercise 8 – Advanced Rounds	158
Special Features	176
Introduction.....	176
Offset.....	177
The Offset Dashboard Tool.....	178
Offset With Draft.....	179
Offset With Draft (continued).....	180
Offset Expand	181
Warp.....	182
Toroidal Bend.....	184
Lip.....	185
Ear.....	186
Facts About Ear Features	186
Local Push.....	187
Radius Dome	187
Pipe	188
Exercise 9 – Special Features	189
Parameters and Relations	200
Introduction.....	200
System Parameters.....	201
User Defined Parameters.....	201
The Parameters Dialog Box.....	202
Relations	203
Relations (continued).....	204
Equality and Constraint Relations.....	205
The Relations Dialog Box.....	206
The Relations Dialog Box (continued)	207
The Relations Dialog Box (continued)	208
Functions and Operators in Relations.....	209
Mass Properties Functions.....	210
Logic Statements	211
Motion.....	211
Solving Simultaneous Equations	212
Exercise 10 – Parameters and Relations	213
Family Tables	226
Introduction.....	226
The Family Table Editor	227
Creating Generic Models	228
Creating a New Family Table.....	228
Naming Items in the Family Table	229
Adding Instances to the Family Table.....	229
The Family Table Editor	230

The Family Table Editor (continued).....	231
Adding Comment Rows	232
Using Negative Values in Family Tables	233
Preview Instances	234
Verify Instances.....	235
Nested Family Tables	236
Reference Models	237
Assembly Family Tables	238
Assembly Instance Configurator	239
Patternize Instances.....	240
Using Microsoft Excel.....	241
Instance Index Files	242
Instance Accelerator Files	242
Instance Accelerator Files (continued).....	243
Replacing Components in an Assembly	244
Drawings and Family Tables.....	245
Exercise 11 - Family Tables.....	246
Component Interfaces.....	261
Introduction.....	261
Defining an Interface	262
Defining an Interface (continued)	263
Defining an Interface (continued).....	264
Nested Component Interfaces	264
Using an Interface	265
Component Interface Preferences	266
Component Interface Configuration Options.....	266
Drag-and-Drop Component Placement	267
Exercise 12 – Component Interfaces.....	268
Component Flexibility	277
Introduction.....	277
Defining Flexibility in the Assembly.....	278
Re-Defining Flexibility in the Assembly.....	279
Defining Flexibility During Assembly Process.....	279
Defining Flexibility in the Part.....	280
Examples of Flexible Parts.....	281
Removing Flexibility	282
Propagate Flexibility.....	283
Exercise 13 – Component Flexibility	284
Assembly Design.....	293
Introduction.....	293
Create a New Assembly.....	294
Assemble Existing Components	294
Create New Components.....	295
Activating Components	296
Working in the Active Component.....	297
Assembly Features	298
Assembly Features (continued)	299
Repeat Components	300
Repeat Components (continued).....	301

Include Components	302
Package Components	303
Assembly Regeneration	304
Assembly Restructure	305
Bill of Materials	306
Custom Bill of Materials	307
Custom Bill of Materials (continued)	308
Exercise 14 – Assembly Design.....	309
Data Sharing Commands.....	319
Introduction.....	319
Import	320
Publish Geometry.....	320
Publish Geometry (continued).....	321
Copy Geometry	322
Copy Geometry (continued).....	323
Merge/Inheritance/Cutout.....	324
Merge/Inheritance/Cutout (continued)	325
Merge/Inheritance/Cutout (continued)	326
Merge/Inheritance/Cutout (continued)	327
Varied Items (Inheritance Only)	327
Updating the Inheritance Feature	328
Creating a New Source Model	328
Shrinkwrap	329
Shrinkwrap (continued)	330
Exercise 15 – Data Sharing Commands.....	331
Top Down Assembly Design	342
Introduction.....	342
Create the Assembly Structure	342
Adding Components.....	343
Assembling New Components.....	344
Define Design Parameters	344
Create the Skeleton Model.....	345
Introduction	345
Facts About Skeletons	345
Create the Skeleton Part	345
Copy the Necessary Design Information	346
Designing in the Assembly.....	347
Finish the Design	347
Exercise 16A – Top Down Assembly Design #1	348
Exercise 16B – Top Down Assembly Design #2	372
Replace Assembly Components.....	386
Introduction.....	386
Replace Unrelated Components	387
Interchange Assembly.....	388
Interchange Types	389
Creating Interchange Assemblies	389
Adding Components to Interchange Assemblies	390
Reference Paring	391
Reference Paring (continued).....	392

Additional Reference Tags	393
Interchange Assembly Model Tree	393
When to use Functional Interchange Assemblies	394
Removing References to Interchange Assemblies	394
Interchange Assembly Review	394
Exercise 17 – Replace Assembly Components	395
Introduction to Pro/PROGRAM	401
Introduction.....	401
The Program Menu	402
Editing a Program	403
Program Structure	404
Program Header	404
Input Section	404
Input Section (continued)	405
Relations Section	406
Features Section	406
Features Section (continued).....	407
Mass Properties Section	408
The Interact Command	409
The Execute Command	410
The Lookup Command.....	411
Assembly Programs	412
Replacing Assembly Components	412
Feature Comments	413
Incorporate the Program	413
Regenerating Models with Programs	414
Creating Models using a Textfile.....	414
Creating Family Table Instances	415
Program Examples.....	416
Exercise 18 – Introduction to Pro/PROGRAM	417
Notebooks	427
Introduction.....	427
Advantages of Notebooks	428
Considerations for Using Notebooks	428
Creating Notebooks	429
Creating Notebook Parameters	430
Parameter Sets	431
Creating Notebook Relations	432
Tables.....	433
Sheets, Notes, and Other Tools.....	433
Example Notebooks	434
Using Notebooks	435
Part Relations Utilizing Global Parameters	435
Global Datums and Automatic Assembly.....	436
Notebook Review	436
Exercise 19 – Notebooks	437
Simplified Representations	448
Introduction.....	448
Types of Simplified Representations	449

Facts About Simplified Reps	450
Simplified Reps in Part Models	451
Simplified Reps in Part Models (continued)	452
Simplified Reps in Assembly Models	453
The Component Chooser	454
Default Rep	456
Default Envelope Rep	457
Light Graphics Rep	459
Zones	461
Zones (continued)	462
Envelopes.....	463
Envelopes (continued)	464
Opening Simplified Reps.....	465
Open Reps by Default.....	466
On-Demand Simplified Reps.....	466
On-Demand Settings	466
On-Demand Settings (continued)	467
Working with On-Demand Simplified Reps	468
External Simplified Reps	469
Using the View Manager.....	470
Using the File, Save a Copy Command	471
Using the File, New Command	472
Exercise 20 – Simplified Representations	473
Managing External References	489
Introduction.....	489
The Model Tree	489
External Reference Types.....	491
Circular References	492
The Reference Viewer	493
The Reference Viewer (continued)	494
The Reference Viewer (continued)	495
Reference Control	496
Reference Control Configuration Options	497
Breaking External References	498
Exercise 21 – Managing External References	499
Appendix A.....	501
Exercise 22.....	501
Exercise 23.....	512
Exercise 24.....	522
Exercise 25.....	526
